

ACINO: Application-Centric IP/Optical Network Orchestration

645127 – ACINO - H2020-ICT-2014-1

www.acino.eu

@acinoH2020

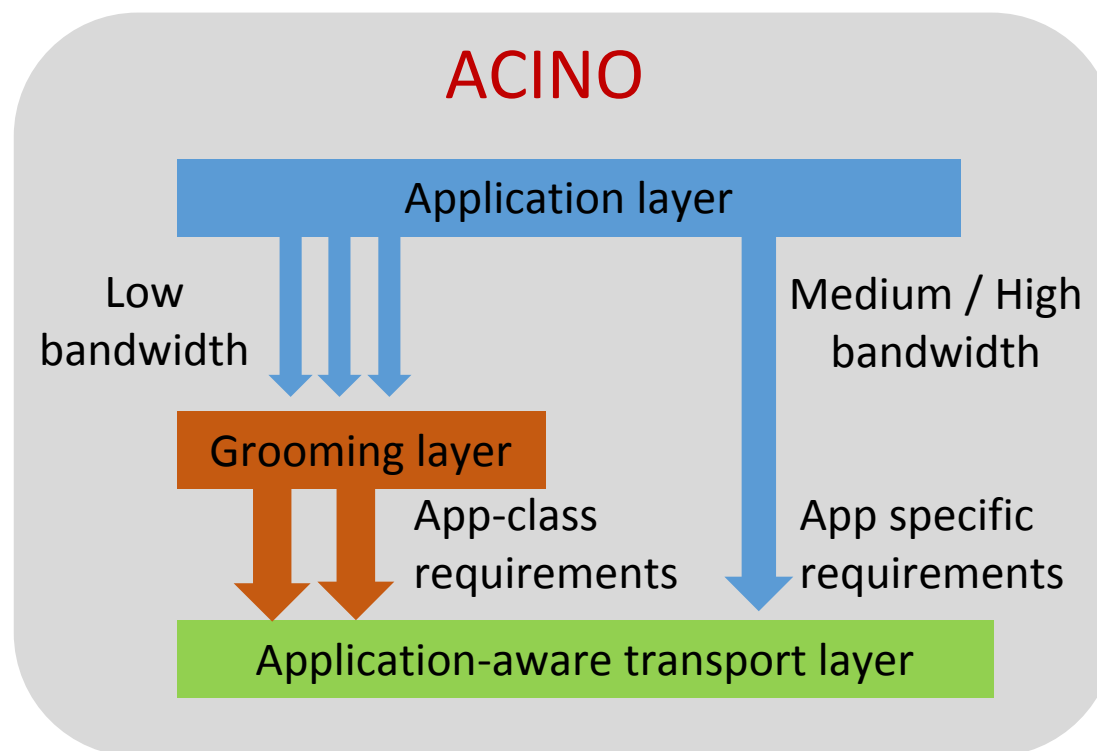

This project is funded
by the European Union

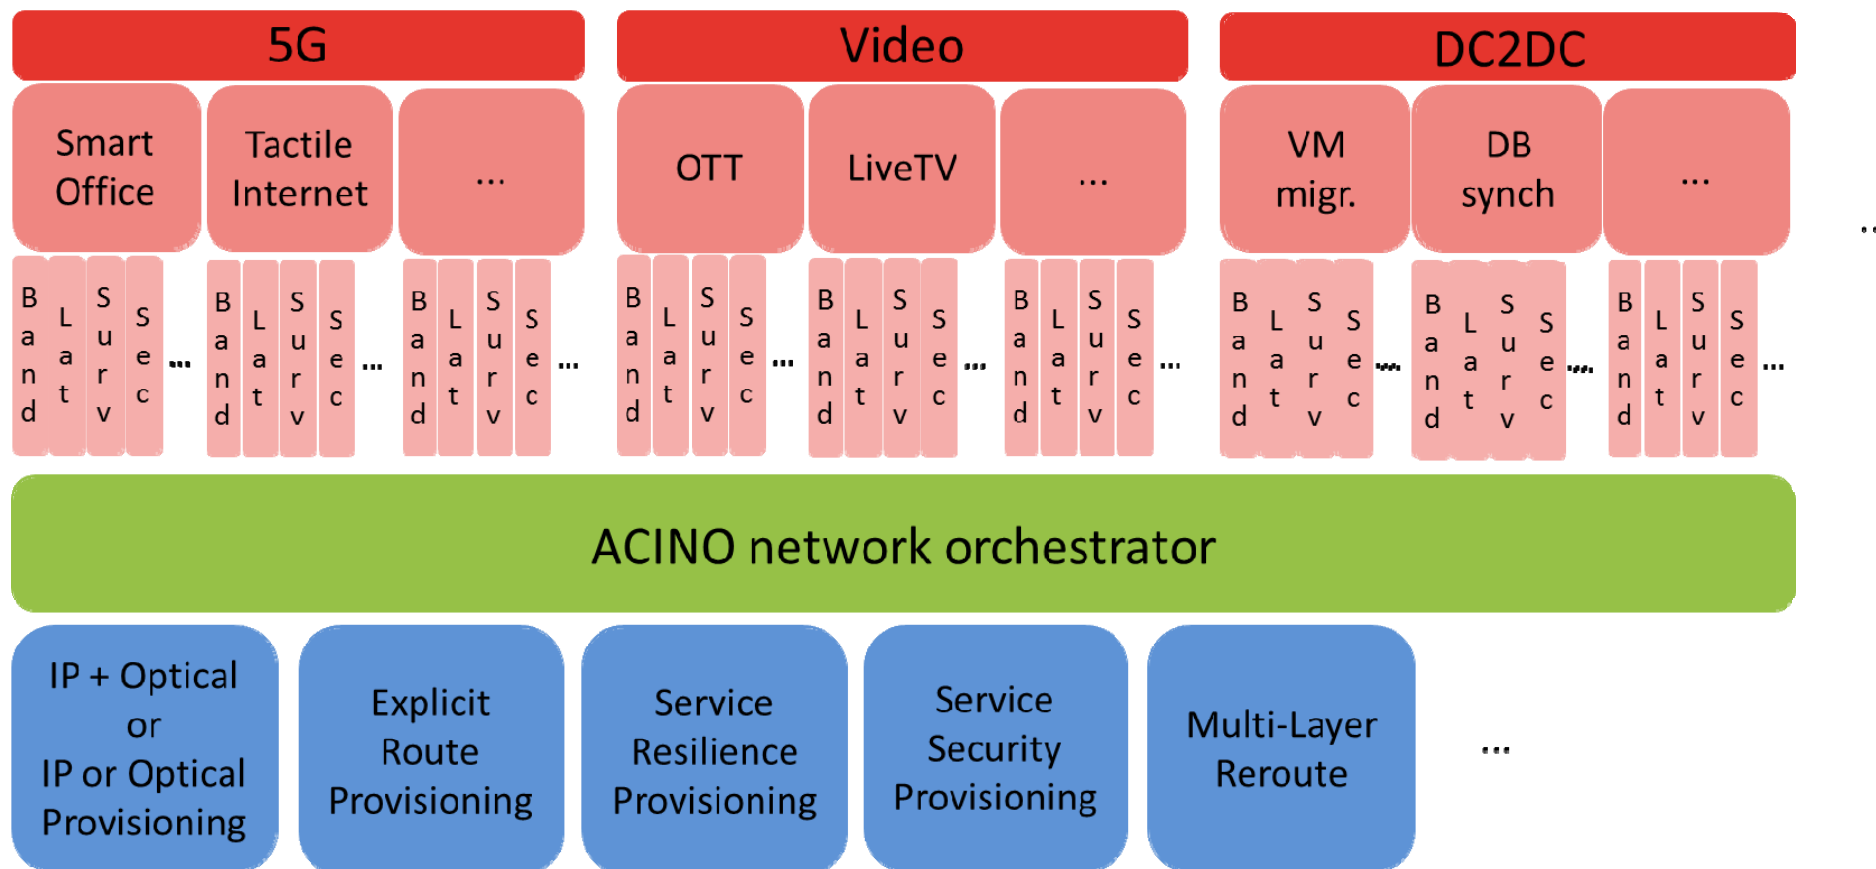

Approach

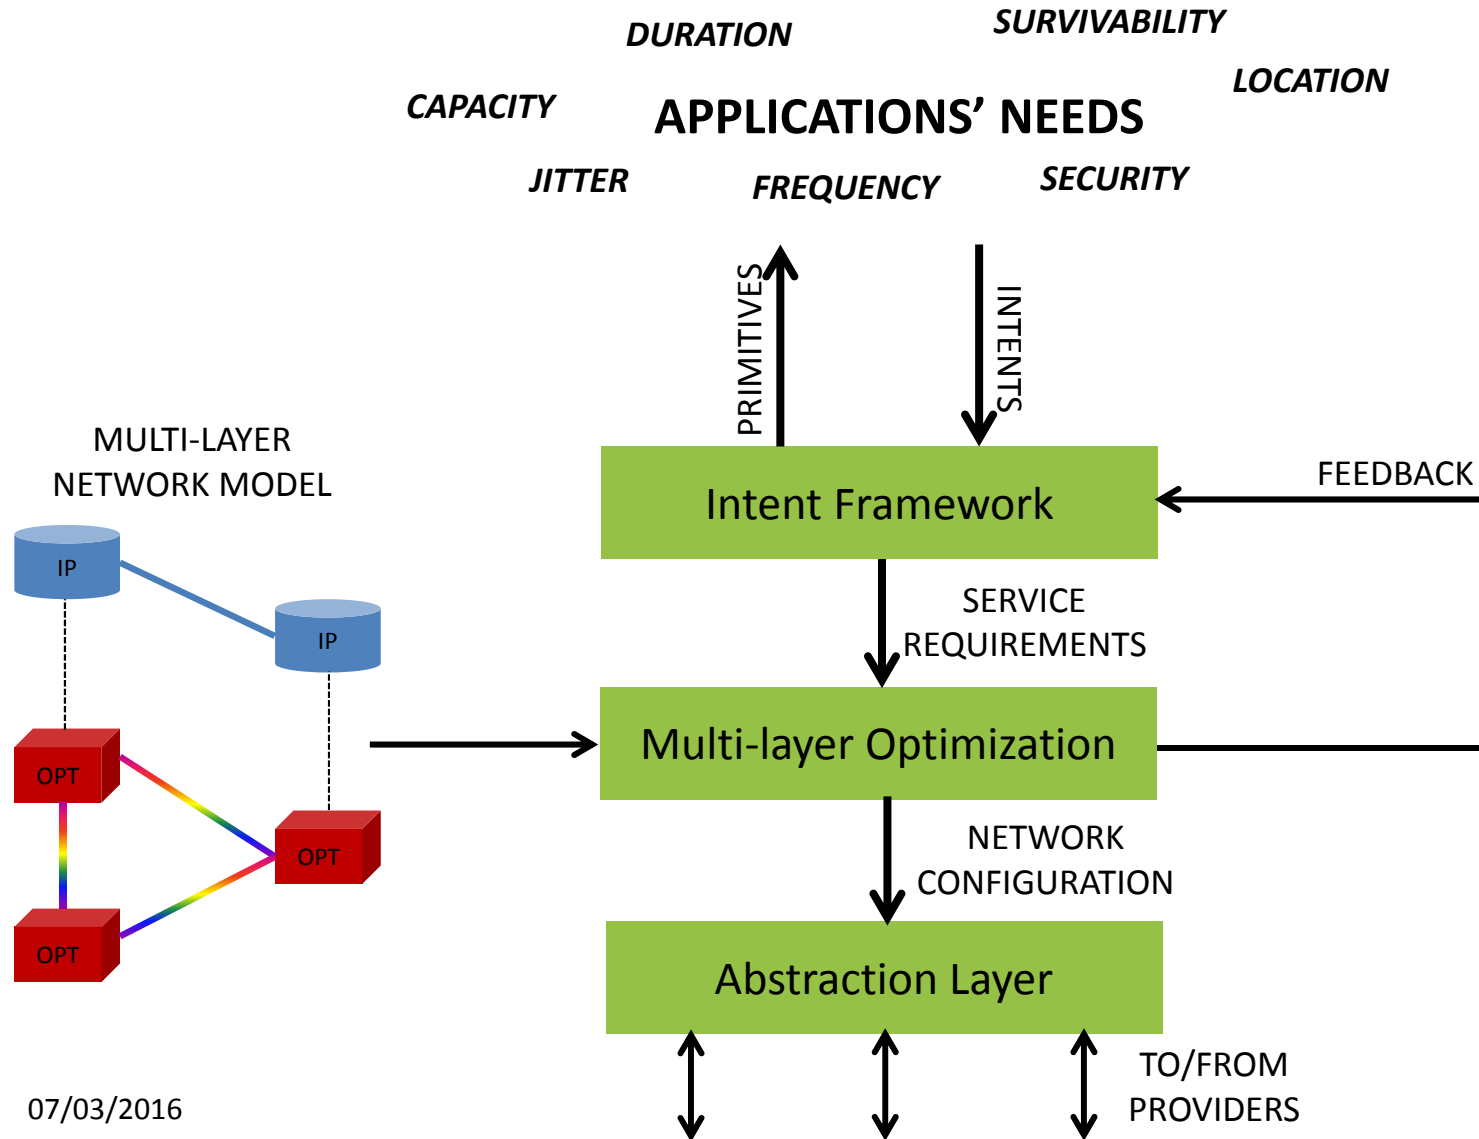

Application-centric: differentiate the service offered to each application all the way down to the optical layer

Use-case definition

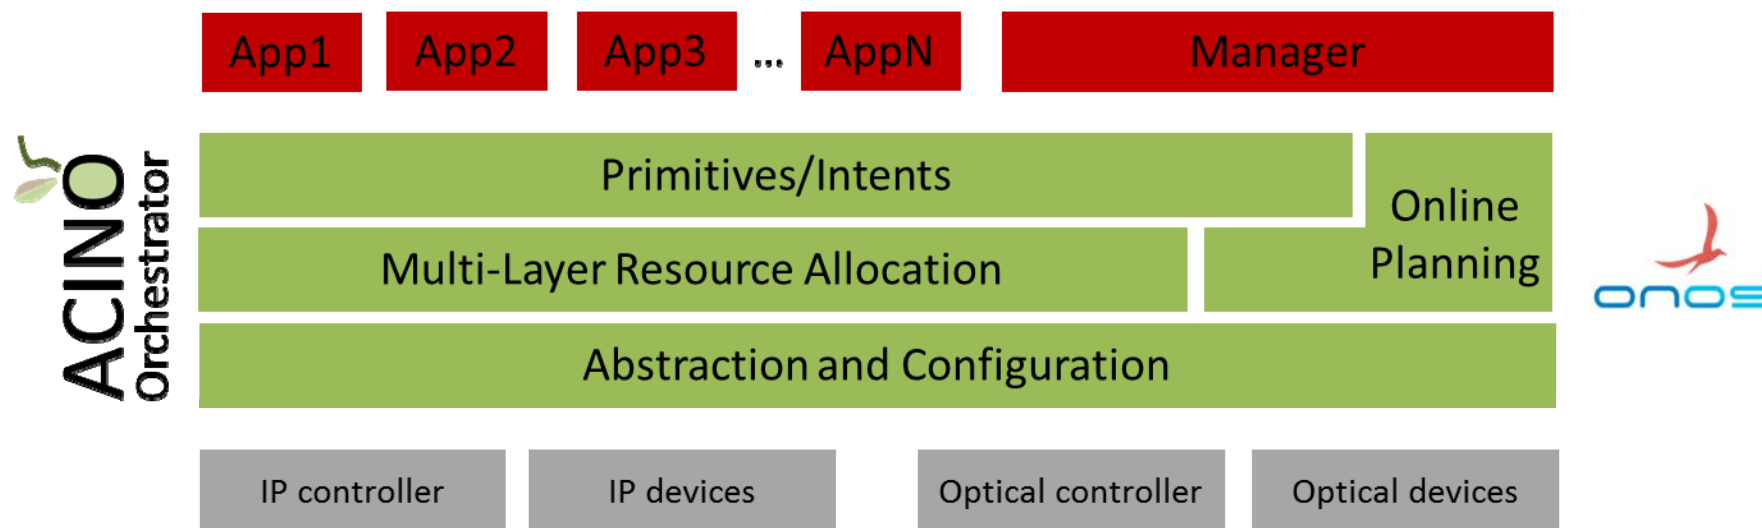

Solution

Implementation

ONOS-based network orchestrator enabling applications to program the IP/Optical transport network by means of high-level primitives

Consortium
